

Project details

Project: Ferrari World
Location: Yas Island - Abu Dhabi -
United Arab Emirates
Investor: Aldar Properties
Architect: Benoy Architects
Roof/wall: Interfalz GmbH & Co. KG.
Façade: Six Construct Ltd.

Ferrari World

Euramax supplied the pre-coated aluminium for the Ferrari World theme park in Abu Dhabi. A project of records. Apart from being the largest indoor theme park and housing the fastest roller coaster in the world it is also the largest standing seam metal roof in the world.

Finish: EuraBuild PVDF 4L Lum
Colour: Ferrari Red and Silver

Project in numbers

Total cladding: $\approx 300.000 \text{ m}^2$
Roof cladding: 202.000 m^2
Painted alu: 359.000 m^2
Tonnage: 1200 T
Paint: 106.000 kg
Coils > 650
Running meters: 600 km

Colour - creativity - design

A project of superlatives

Situated right next to the brand new Abu Dhabi Grand Prix F1 circuit Benoy Architects designed the iconic roof on the classic body shell of the Ferrari GT car. The roof only is over 200.000 m² whereas the total project volume including aluminium façade covering is approximately 300.000 m². The equivalent of 50 football pitches !

Euramax supplies innovative solutions in pre-coated aluminium coil

Dedicated design consultation

Euramax focuses on high end project architecture. Our Area Managers offer design consultation to architects, which was also the case in the Ferrari project. Extensive evaluation with Benoy Architects and the investor Aldar Properties has led them to choose Euramax pre-coated aluminium in Ferrari Red and Silver.

Ultimate challenge

The combination of high gloss Ferrari colours and a harsh environment with salt (sea), sand (desert) and sun (high UV impact) meant a big challenge for our technicians. In close cooperation with our paint suppliers the EuraBuild PVDF 4L paint system with Lumiflon topcoat was advised. This state-of-art paint system will cope with all environmental extremes. Today all coils have been painted, and we are anxiously waiting for the 1st of November 2009 when the eyes of the world will be on this building during the Abu Dhabi Grand Prix.
